

COMPANY PROFILE

IS4IT Schweiz AG, based in Zug, is a specialized IT service provider for information security in Switzerland and part of the IS4IT Group.

The cybersecurity specialist's full-service offering targets companies and organizations with increased IT protection requirements. The cybersecurity solution portfolio covers topics such as information security strategies, security architectures and infrastructures, identity management, defensive and offensive security through to incident management, data security, data protection and certifications as well as governance, risk management & compliance (GRC).

In addition, IBM's AI platform optimizes processes and workflows across the organization. IBM watsonx underpins our AI business. While watsonx.governance supports companies in complying with the EU AI Act, watsonx Orchestrate drives enterprise-wide, AI-powered process optimization.

The solutions designed by IS4IT Schweiz AG can be implemented directly and operated as managed services.

For various IT services such as Managed SOC, Managed SIEM, Managed SOAR, or Managed Data Protection, IS4IT Schweiz AG relies on the infrastructure of the IS4IT Group. The company uses certified German data centers, guarantees established, secure structures and processes, and always assumes overall coordination and responsibility for the customer.

The IS4IT Group, which consists of IS4IT Schweiz AG, IS4IT GmbH, IS4IT KRITIS GmbH, and IS4IT Cyber Security Austria GmbH, serves customers in Germany, Austria and Switzerland from its headquarters in Oberhaching near Munich and its locations in Berlin, Eschborn, Leinfelden-Echterdingen, Nuremberg, Obrigheim, Schwaig, Vienna, and Zug.
